SUMMARY

I am a dedicated Computer Science Engineering student with a proven track record in various hackathons, including a Grand Finalist position. My experience encompasses leading development projects with a strong skill set in HTML, CSS, JavaScript, MongoDB, Express.js, React.js, Next.js, Node.js, SQL queries and various technologies relevant to the web. I am passionate about utilizing my technical knowledge to create systems that improve real-world applications and i am eager to grow in my field.

SKILLS

Html	Css	Javascript	MongoDB	Express.js
React.js	Next.js	Node.js	Material UI	Shadcn UI
Bootstrap	Strapi CMS	MySql	Postman	Github

PROJECTS

SSIP Hackthon: Message Verification

To verify the genuineness of messages shared on social media.

- NLP, News API, Flask, Machine Learning, SQLite Database.
- Developed an ML model to verify news as TRUE or FAKE on real-time data.
- Implemented Speech to Text for searching.

SSIP Hackthon: Fake News Detection

Advanced Fake News Detection System.

- Natural Language Processing, Deep Learning, Machine Learning.
- Developed a system to empower users with verified information.

SIH Hackthon: Attendance System

Smart Attendance System for School.

- Integrating ML algorithms to monitor students on CCTV.
- Optimizing attendance tracking and administrative processes.

BodyShody

Fitness Website.

- Developed a comprehensive Fitness Website featuring exercise management, BMI Calculator, Diet plan.
- Utilized PHP for backend logic, HTML/CSS for frontend design.

Document Management System

The Document Management System is a web-based application designed for managing document requests and approvals efficiently. It is built using modern technologies, including Next.js, Strapi, PostgreSQL and Nodemailer

Farm 2 Fresh - Trading Platform

Developed a streamlined trading platform using the MERN stack, enabling efficient product listing, inventory management, and buyer-seller interaction.

Designed an intuitive interface with essential features, ensuring high performance, scalability, and security without integrating payment gateways. Tailored for both small-scale and large-scale users to simplify trade and enhance the user experience.

EXPERIENCE

Team Leader (Developer)

The Special Character

05/2024 - 06/2024 Ahmedabad, Gujarat

Team Leader (Developer)

- Skills: Html, Css, JavaScript, Next js, Strapi, PostgreSQL

Software Developer Intern

AHA! Solar

09/2024 - 03/2025 Ahmedabad

Tech Stack & Skills:

Node.js, JavaScript, React.js, MERN stack
RESTful API design & integration
MongoDB, MySQL & database optimization
Authentication (JWT, OAuth) & security best practices

- Developed & optimized React.js UI for 3+ live projects (GEDA EV, IGROWGREEN, GMS), improving dashboard UI/UX and API efficiency by 30%.
- Implemented authentication (AuthGuard) and secured 100% of protected routes.
- Enhanced search filters & UI components, improving user experience by 25%.

KEY ACHIEVEMENTS

Grand Finalist in Hackathon

Grand Finalist at Azadi Ka Amrit Mahotsav Hackathon (State Level) held in Feb 2023.

EDUCATION

Bachelor of Technology

Vidush Somany Institute Of Technology And Research (7.3 CPI)

10/2021 - 06/2025 Gandhinagar, Gujarat

Higher Secondary (Class 12)

Hillwoods School (67.2 Percentage)

06/2020 - 07/2021 Gandhinagar, Gujarat

Secondary (Class 10)

Hillwoods School (78.2 Percentage)

06/2018 - 05/2019 Gandhinagar, Gujarat
